

Multi-stack sliding doors

Introducing Multi-stack sliding doors - the most entertaining doors on the market.

When they're closed, the broad expanses of glass, up to 5.3 metres wide, give you uninterrupted outdoor views and flood your room with natural light.

When they're opened, the doors slide neatly away, one behind the other, for the ultimate in indoor outdoor entertaining.

With three and six panel configurations available and a variety of panel widths, Multi-stack doors suit just about any room size. Three panel doors can be made to open to the left or right.

Doors are fitted with security locks and handles, and come in a wide range of fashionable powder coat and anodised aluminium finishes.

A flyscreen or security door can also be added and, for extra convenience, a common key can be supplied for sliding and security doors.
